.NET/C# developer with 4+ years of experience delivering web applications and APIs across the SDLC. Strong in ASP.NET Core, Angular, Entity Framework Core, and SQL Server, with hands-on CI/CD exposure in Azure and AWS. Collaborates effectively in Agile/Scrum teams and contributes to AI-enabled features. Seeking an Intermediate .NET Developer role to drive scalable solutions, clean architecture, and high-quality delivery.

Experience

OCT 2024 – PRESENT
Software Engineer II | LexisNexis | Durban

- Build features and fix defects across **ASP.NET Core APIs** and **Angular** front-ends.
- Design/consume REST endpoints; optimize EF Core queries and data access patterns.
- Contribute to **CI/CD pipelines** (Azure/AWS) improving release reliability and speed.
- Collaborate in **daily standups, sprint planning, and reviews**; write unit tests and participate in code reviews.
- Support an **AI-driven initiative** to enhance product capabilities (POC integrations, data preparation, API orchestration).

Selected contributions: Accelerated feature delivery, reduced production bugs, and improved code quality through automated checks and tests.

OCT 2023 – OCT 2024
Software Developer | Randwater | Glenvista, Gauteng

- Maintained and enhanced the corporate website using **PHP, HTML, JavaScript** on **XAMPP**.
- Shipped incremental features and fixed bugs, improving site stability and user experience.
- Implemented basic version control practices and documented changes for handover.

JAN 2023 – SEP 2023
Software Developer Contract | DUT AppFactory | Durban

- Led development on a new **.NET 7 + ABP Framework** web application (server-side MVC + EF Core).
- Delivered features across modules (e.g., user management, reporting), participated in **daily stand-ups** and demos.
- Practiced **clean architecture** patterns and wrote unit tests to safeguard core business logic.

JUN 2022 – DEC 2022

Software Developer Intern | Izingcweti ICT | Durban

- Built a new company website and improved data access by introducing a more performant database setup.
- Collaborated on requirements gathering and delivered iterative updates with stakeholder feedback.

Project Highlights

- **ABP-based Management App** — .NET 7, ABP, EF Core, SQL Server

Designed domain entities, repositories, and role-based authorization; implemented CRUD modules and reporting pages.

- **ASP.NET Core + Angular Dashboard** — .NET 6, Angular, REST APIs

Built a modular dashboard with reusable components and API integration; added unit tests and error-handling middleware.

- **AI-Assisted Feature Exploration** — Azure/AWS services

Contributed to POCs for intelligent search/insights to enhance product functionality (data pipelines, API integration).

Skills

C#, JavaScript, HTML, Razor • ASP.NET Core, .Net 6/7 , ABP Framework, Angular • REST APIs, Entity Framework Core, LINQ, ASP.NET Identity • SQL Server, MYSQL • Azure, AWS, Git, CI/CD(Azure DevOps, GitHub Actions/Code Pipeline) • Clean Code, SOLID, Unit Testing(xUnit/NUnit), Agile/Scrum, Code Reviews, Debugging, System Testing.

Education

2020 - 2022

Diploma in Information Communication Technology | Mangosuthu University of Technology | Durban

Languages

- English – fluent
- Isizulu - fluent
